## **GBOX Announces the Production of Stainless Steel Porsche 996/997 Clutch Lines**

### **Part # GB 996.423.377.08**

**Boulder, CO 9/30/08** – GBOX is now producing direct replacement clutch lines for all Porsche 996/997 vehicles. This performance clutch line improves pedal feel, reduces synchro wear, and ensures that the clutch is fully and quickly disengaged.

This product features a braided stainless steel line fitted with factory Voss quick-disconnect fittings. The fit and finish of these lines is exceptional.

Porsche shops, private car owners, and high-performance tuners alike will benefit from this easy to install product. Virtually anyone can make this upgrade with a few simple tools, in a very short amount of time, with no modifications to the vehicle.

If you or your customer is suffering from lack-luster clutch pedal feel, the GBOX stainless steel clutch line is the answer. Improved performance, easy installation, and safer shifting make this product at home in any 996/997 Porsche.

This Product is available now. For additional information, pricing, and availability on this product, contact GBOX at (303) 440-8899.

**ABOUT GBOX:** GBOX is a Porsche driveline service and development company located in Boulder, Colorado. GBOX provides premium rebuild services for all models of Porsche, and brings over 40 years of experience to its customers. GBOX also specializes in custom engineered performance, and hard-to-find parts including steel synchros, billet shift forks, and many other high performance products.
